Summary

Highly motivated and creative self-learner almost 6 years of experience; prioritize continuous learning, stakeholder satisfaction, and possess strong problem-solving skills; ability to work independently and quickly generate diverse solutions. As a skilled and driven software professional, I am committed to adding value to any team.

Skills

Java Spring Boot, Ruby on Rails, Node.js express, JavaScript, Python, Object Oriented Programming, Database Management, Data Structures, PostgreSQL, MongoDB, gRPC, Redis, Temporal, Agile, Team Leadership

Experience

FedEx | India

Full Stack Developer Senior II | 07/2024 - Present

- Orchestrated and developed to push the clearance data to FedEx global tracking site, significantly reducing the integration of clearance data for a country with global tracking page by almost 95%, this enabled customer's visibility on clearance information.
- Improved the performance of the FiT product by almost 2X by query optimization, database partitioning and process through Java Stream API for large memory operations.
- Initiated and implemented gRPC for existing service in Java Spring Boot.

Yubi (formerly CredAvenue) | India

Senior Software Engineer | 01/2021 - 06/2024

- Designed a low code framework(LCF) and lender self serve(LSS) using Ruby on Rails, which helped reduce 75% of development effort required each time to integrate with a lender system. Resulting in 3X revenue increase.
- Architected and developed various micro-services in building loanOS using Java Spring Boot. Multiple credit products can be created by extending loanOS.
- Enhanced the performance of the products by 4X through loanOS, by leveraging the use of Redis, Temporal and CockroachDB.
- Developed an AWS lambda function in Node.js and exposed through API gateway for inbound APIs.
- Exercised ownership in mentoring, team building and training fellow teammates and improved the coding standards. Worked cross functional across core products and integrations.

Foxsense Innovation | India

Product Hacker | 05/2020 - 12/2020

- Engineered asynchronous, synchronous RESTful APIs using Node.js express to process the documents in NoSQL databases and AWS S3 bucket for a B-B e-commerce platform by owning the entire SDLC process of the project.
- Developed, optimized RESTful APIs using Python flask to process the data in PostgreSQL.

WeInvest | India

Software Engineer | 05/2019 - 01/2020

- Implemented and integrated the Wealth Management Platform using Ruby on Rails with postgresSQL storage, to monitor, grow and provide advisories to increase the assets.

Education

PSG College of Technology | India

M.Sc. Software Systems | 07/2019

Certificates

SAFe Agile for teams, GetGoing - Introduction to Golang, Java Masterclass - Workshop
